STONEBANK IRONCRAFT

Stonebank has been in business for over 30 years designing and building specialist metal fencing, gates and other ironwork for country houses and Estates. We carry out installations across the UK for professional, municipal or private clients. Much of our work is to individual specification. Our products are designed to last through several generations.

Our fencing is unique in that rather than use panels we build from continuous welded steel lengths, making contouring on either plane look both more natural and elegant.

All preparatory construction work is carried out in our factory off the Fosse Way in Gloucestershire. We install throughout the UK using our own fully employed skilled teams. We aim to provide the best possible product and service in this field.

Our standard fencing is 1.2m (4 ft) high with uprights from 40 x 10mm flat steel. Top rail 20mm round and 4 lower rails from 25 x 8mm flat steel.

Posts are spaced 1m apart. The 5 horizontals are seamlessly welded to follow contours and curves as required.

Our construction method for fencing means we can match, if required, any of the regional differences in design historically found around the UK as well as all sizes from simple dividers to deer fencing.

For most jobs a site visit is essential

FENCING/DEER FENCING

GATES

We make field, entrance, pedestrian and kissing gates in any combination, size or finish required. We have standard designs for each. Alternatively we will match existing or old gates, or can construct new to individual specification.

RAILINGS

PERGOLAS & GAZEBOS

Our pergolas are constructed from 20 or 25mm solid steel bar, and comprise a series of hoops with a row of top and two rows of side connecting bars. They can be any size, any length and can have side hoops added to make offshoot arches, walkways etc.

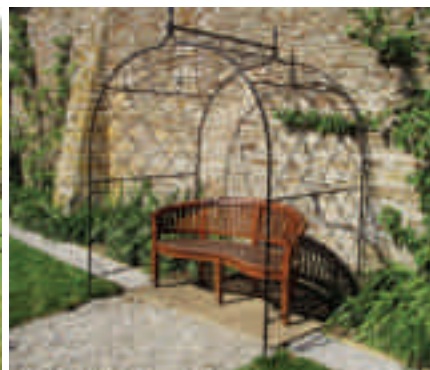

TREE GUARDS

This is our range of standard tree guard designs. Built in two sections and available in different finishes. We can also match old or make bespoke to order.

- 1) *Large Circular* - 1.8m (5'11") high when fitted. 1260mm diameter at base, 4 uprights, 7 horizontal rails.
- 2) *Small Upright* - 1.53m (5ft) high when fitted. 400mm diameter, 12 uprights, 3 bands.
- 3) *Large Upright* - 1.97m (6'6") high when fitted. 710mm diameter, 22 uprights, 3 bands.
- 4) *Medium Circular* - 1.35m (4'6") high when fitted. 750mm (2'6") diameter at base, 1175mm (3'10") diameter at top. 4 uprights, 6 rails.

SPECIAL COMMISSIONS

We undertake a wide range of bespoke work. Please call us to discuss your requirements.

We also supply gazebos, arbors, fruit cages, and all metalwork for working kitchen gardens.

FINISHES

BARE METAL

PAINTED

HOT DIP GALVANISED

All products can be supplied in a choice of finishes.

BM - Bare Metal

Paint at home or let the product weather naturally with surface rust.

Painted

Bare metal is painted with an oxide undercoat and 2 topcoats, standard colours black and green, with other colours available to order.

HDG - Hot Dip Galvanised.

Bare metal is galvanised which is silver grey in colour and weathers to a dull grey.

HDG and Paint

Bare metal is galvanised as above and then painted with a high build vinyl paint for maximum protection and an attractive finish. Standard colours black and green, others available to order.
